

# Product Overview

Womens health

## Fetomaternal Hemorrhage

---

High-quality products for the accurate detection and quantification of fetal Red Blood Cells in maternal blood in case of Fetomaternal Hemorrhage.

## Premature birth

---

Rapid point of care tests for accurate diagnosis of PROM and to assess the risk of pre-term delivery during pregnancy.

## Fetomaternal Hemorrhage

### Fetal Cell Count™ Kit

Complete assay for routine diagnosis of Fetomaternal Hemorrhage (FMH) using anti-HbF and anti-CA

Product code	Size	Regulatory Status
IQP-363	25 tests	IVD C E

### FMH QuikQuant™

Rapid assay for Fetomaternal Hemorrhage Quantification

Product code	Size	Regulatory Status
QQF-100	100 tests	IVD C E

### FMH Kit

FITC conjugated Anti-RhD reagent for the determination of Fetomaternal Hemorrhage

Product code	Size	Regulatory Status
9447 <sup>(1)</sup>	100 tests	IVD C E

<sup>(1)</sup> Product distributed for IBGRL, UK

### FETALtrol™

Tri-level stabilized blood controls with known human fetal erythrocytes content in human adult blood

Product code	Size	Regulatory Status
FH101 <sup>(2)</sup>	2x 2ml vials/level	IVD C E
FH102 <sup>(2)</sup>	1x 2ml vial/level	IVD C E

<sup>(2)</sup> Product distributed for R&D Systems, USA

# Womens health

## Point of care tests

### AMNIOQUICK®

A simple and rapid test that allows in vitro detection of IGFBP-1 (Insulin Growth Factor Binding Protein 1) from a vaginal swab sample.

Product code	Size	Regulatory Status
0524_K10 <sup>(3)</sup>	10 tests	IVD C E

<sup>(3)</sup> Product distributed for BIOSYNEX, F

### fFN Rapid Test Cassette

A qualitative test device for the estimation of the risk for premature birth.

Product code	Size	Regulatory Status
FFF-502 <sup>(4)</sup>	25 tests	IVD C E

<sup>(4)</sup> Product distributed for ACRO Biotech INC, USA

## Diagnosis of active CMV infection

### CMV Brite™ Turbo Kit

Complete kit for the diagnosis of an active CMV infection (2 hours)

Item	Product code	Size	Regulatory Status
CMV Brite™ Turbo	VIR-CMV 110	110 tests	IVD C E 510(k) #k991650 USA

Item	Description	Product code	Size	Regulatory Status
CMV Brite™ Kit	Complete kit for the diagnosis of an active CMV infection (4 hours)	VIR-CMV 100	100 tests	IVD C E 510(k) #k951550 USA
CMV Control slides	CMV pp65 positive and negative cytoposts	VIR-CMV CS05	5 slides	IVD C E 510(k) #k991650 USA
FITC conjugate	Sheep anti-mouse-FITC immunoglobulin with Evans Blue	VIR-FITC	200 tests	IVD C E
CMV C10/C11 cocktail	Mouse monoclonal antibody C10/C11 mix specific for CMV pp65	VIR-CMV C10/C11	200 tests	IVD C E

**Pregnostic®**

Pregnostic® comprises a brand new product line resulting from research and development performed by IQ Products. These ELISA based kits are based on cutting edge prognostic markers to establish the risk to develop the most common pregnancy related disorders like pregnancy related hypertension (PIH), pre-eclampsia (PE), gestational diabetes mellitus (GDM), intra-uterine growth restriction (IUGR) and premature birth. With the help of national and international research groups IQ Products is linking hypotheses to data, resulting in patented applications in this prenatal field. Highly promising biomarkers have been found suitable for the risk assessment of early-onset pre-eclampsia and GDM during early pregnancy, while our current research is set to unearth relevant markers for the risk assessment of premature birth. Our PE biomarker is already available for research purposes.

## **Pregnostic®-PE**

Pregnostic®-PE contains all components required for quantification of human ESM-1 in cell culture supernatants, serum or plasma. This human Pregnostic®-PE ELISA set uses the robust and well-described quantitative sandwich immunoassay technique. The kit is available for research purposes in cooperation with IQ Products. The performance characteristics of this kit have not completely established yet.
